

Our range of systems are prefabricated to meet your design, cost and production requirements.

## PREFABRICATED PANELS AND FRAME

For the prefabricated panel and frame market we draw on our companies 20+ years of experience producing prefabricated membrane for the construction industry in Scandinavia. We prefabricate membrane sections to fit any roof panel size and configuration with the utmost consideration given to the harsh environments these roofs can be subject to.

Our **PROFAB VP** system is prefabricated to meet your design, cost and production requirements. We utilising our unique secret fix method of attachment so you benefit from significantly faster fitting times. This attachment method also has the benefit of removing the health and safety issues associated with conventional abonded methods.

A full range of fittings, accessories and custom trims are used to provide complete reliable roofing systems. Each element has been designed and manufactured to give durable, watertight performance and visual appeal.

To give an attractive and dynamic impression of the roof, **PROFAB** can be supplied with architectural profiles for standing seam effect and our membranes are available in a range of colours.

At **PROFAB** we also offer the complete site commissioning of your roof structures. Hot air welding is used to create a complete homogeneous seam and warranty approval can be issued following work undertaken.

### The benefits of **PROFAB** systems include:

- Quick and easy installation, therefore cost effective
- Can be installed in a wide variety of temperature and weather conditions
- Allows superior water vapour permeability
- No need for adhesives or solvents
- The membrane has a specially developed anti-slip finish
- Allows for recycling of membrane at end of lifecycle
- Creates an airtight roofing solution
