

Our range of systems are prefabricated to meet your design, cost and production requirements.

VOLUMETRIC MODULAR BUILDINGS

PROFAB supply prefabricated single ply roofing and waterproofing systems for use on the following building types:

- Permanent
- Relocatable
- Jackleg & Cabins

Our product and service range includes the following:

PROFAB VP

Systems for use on long term exposed roofs.

PROFAB VT

Systems for use on short term exposed roofs to protect modules whilst in transit and storage.

PROFAB VR

A unique service that can be used to refurbish units whilst in use anywhere in the UK.

All the **PROFAB** range of systems are prefabricated to meet your design, cost and production requirements. We utilising our unique secret fix method of attachment so you benefit from significantly faster fitting times. This attachment method also has the added benefit of removing the health and safety issues associated with conventional bonded methods.

A full range of fittings, accessories and custom trims are used to provide complete reliable roofing systems. Each element has been designed and manufactured to give durable, watertight performance and visual appeal.

At **PROFAB** we also offer the complete site commissioning of your module roofs. Hot air welding is used to create complete homogeneous seams and warranty approvals are issued following completion and inspection.

The benefits of PROFAB systems include:

- Quick and easy installation, therefore cost effective
- Can be installed in a wide variety of temperature and weather conditions
- Allows superior water vapour permeability
- No need for adhesives or solvents
- The membrane has a specially developed anti-slip finish
- Attachment methods can produce build-up savings
- Allows for recycling of membrane at end of lifecycle
